lil Weggie Construction

Quality Materials and Construction make lil Weggie the most reliable in the market

A – Thumb Slide – Polycarbonate

- Wide knob is easy to push (easy open, easy close)
- Material will not crack

B – Tension Spring – Heavy Gauge Stainless Steel

- Convex tension offers maximum support

C – Tension Rollers – Dual Billet Aluminum

- Extra friction support keeps material from slipping

D – Wide Opening

- Easily fits and holds thicker material than competitors

E, G, H and I – Housing – Glass Mixed Nylon

- Honeycomb design reduces weight and adds strength
- Outer shell is UV protected
- Alignment with posts for stability
- Sonic welded housing will not break

F – Trapped Bell Eyelet – Polycarbonate

- Same material as bullet proof glass – can't be damaged

No plastic in the design like other tarp clips on the market

lil Weggie vs. competition

Quality Compare Is Not Even Close

VS.

lil Weggie is proven to secure what your consumers are trying to protect

- 3rd party testing results show the lil Weggie holds more material at stronger load capacity than any other tarp clip in the market.
- While some may claim similar strength, they only work if the tarp has a seam for the device to grip. lil Weggie holds with or without a seam - always.

**Your consumers are buying to secure valuable items –
why take a chance with cheap plastic?**

Why you need lil Weggie on your shelf....

- Security your consumers want (tarps grommets aren't always perfect – but we are)
- Quality unsurpassed in the market
- Produced in the USA
- The best materials available
- Multiple uses with the wider opening
- Higher ring item improves your profit dollars
